Today is the launch of #buydonegal campaign which runs to the end of December.

It is estimated that if every Donegal person at home or overseas purchased an additional €5 weekly on average of local products, services and produce, over the next 12 months, (€250 each annually) that an additional €250 million would be generated in the County. That would translate to 250 New Jobs in Donegal.

Think of the social impact and social dividend this additional employment would create in our County. This is a campaign worth supporting.
